Founder Message

Dear Students and Parents,

SLBS is one of the fastest growing, educational brand in India which is a blend of continuous innovation and global bench marking. The objective of the SLBS Education Group is to ready youth who can be gainfully employed upon completion of their courses.

Our outstanding progress by creating world class infrastructure consisting of a sprawling educational campus with green cover which is a landmark.

Our focus is on Research, Technology & Innovation.

I am overwhelmed by the progress made by the institution at various levels – academic, cultural and sports. The noteworthy experience of mine is the standard of discipline and the uniqueness that the students and parents have established in the institution.

Dedicated teachers, sophisticated equipments, sincerity and punctuality has proven our merit and I am sure that in years to come the institution will surpass many established existing institutions.

In addition we have several diversifications, the primary of which is the IT park which will be a challenge to accomplish and achieve. I urge every SLBSIANS to make efforts to take the brand to newer heights. Let us make our SLBS best in professional education in India.

I wish the students, staff and all the employees of the institution best of luck in making the institution great.

Sh. Jeetendra Godara

Chairman's Message

It gives me immense pleasure and pride to share my experiences about my small ship sailing along with the young sailors a long way from shore to shore. It has been a remarkable experience guiding and steering through turbulent times and of course there were many memorable occasions, the memories of which compel tears of joy to trickle down my cheeks!

SLBS Education Group has blossomed over the years. Since the last decade SLBS Education Group have been undergoing remarkable changes, leaving behind old and out-dated traditional methods of teaching that hinder the over-all development of student. Such out-dated methods only serve as hurdles in the improvement of skills, talents, intelligence, and confidence and deter the spirit of competition in a child, which are essential to become a successful human being in the society and eventually become a worthy citizen of the country!

The new techniques adopted in the teaching-learning process have proved fruitful and beneficial to students and teachers alike! The freedom of thought and free environment is thus nourishing their inner knowledge simultaneously.

Er. M.R. Choudhary

Chief Managing Director Message

Education is a lifetime process with no true beginning or ending. It is through education only that you can change the face of the world.

Educated people are the strong pillars of the society and country as they play a key role in the development. Education provides us a platform which gives us new spheres of life with great opportunities ahead.

In this developing Era, Education has emerged as one of the most important thing. Education not only develops personality, but makes us mentally and intellectually strong. Education eradicates social evils that are present in the society.

SLBS Education Group has been working in this field of imparting quality education for about 25 years. Our main vision is to provide quality education even to the students of rural background so that they don't lack behind from others in this Modern Era. SLBS has always tried to not only make brilliant students but also to mould them as a responsible citizen of the country which would work for the development of the country and society.

SLBS has always tried to
contribute in the development of the country and society and will
continue to do that by providing education at
its best to the students.

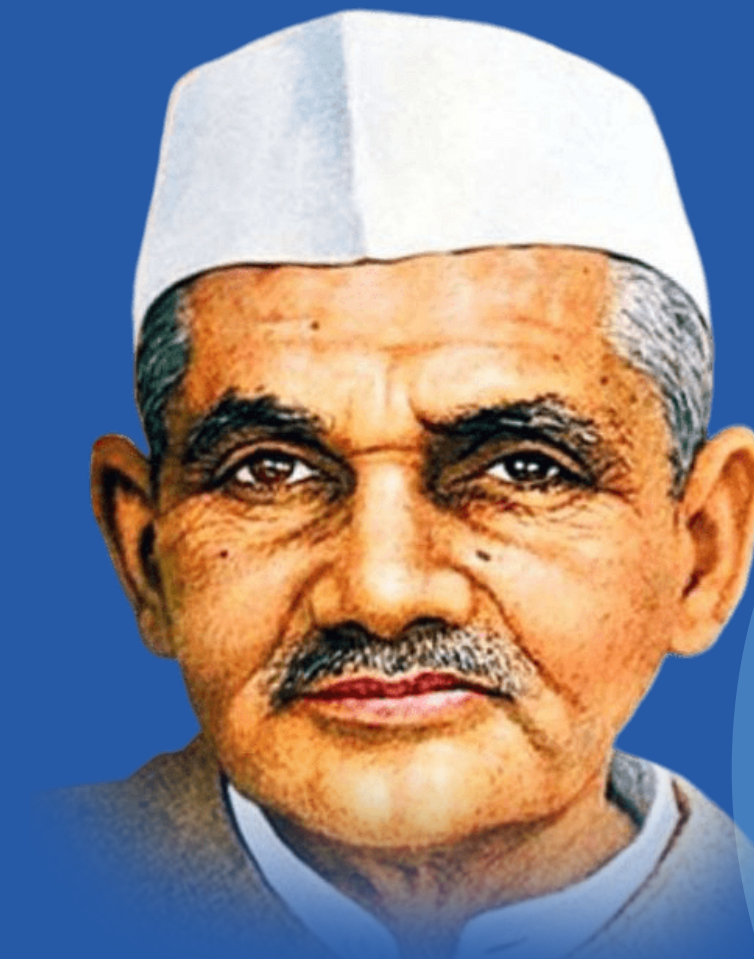

Priyanka Jeetendra Godara
